

Vision

Elders aging in place in a comfortable, tropical assisted living community.

Mission

To provide a model assisted living community in harmony with the environment and fully integrated within the surrounding community.

Guiding Principles

- 1. We believe that all elders deserve a supportive living environment; therefore the Florida Keys Assisted Living Community serves persons of all income levels.*
- 2. We recognize that the Florida Keys Assisted Living Community may be the only assisted living offered for elders, therefore residency priority will be given based upon the length of Monroe County residency.*
- 3. We believe that all persons contribute to the richness of the community, and so low cost, moderate cost and high cost units will be integrated throughout the community.*
- 4. Because we value each person, all residents enjoy the common elements equally.*
- 5. Because we are a part of the community, we will welcome the compatible shared use of a community center and park by friends and neighbors.*
- 6. Because we believe in self-determination, the Florida Keys Assisted Living Community will have a strong Resident Council, which will share in management decisions.*
- 7. We value diversity, therefore we respect the individuality of each resident.*
- 8. We value continuous growth, and so we will promote a milieu that supports life-long continued learning and personal growth experiences.*
